

Ex. No.: 1	Online Event Registration & Promotional Portal Using HTML5 (Form + Media Elements)
09.12.2025	

Aim

To design and develop an Online Event Registration & Promotional Portal using HTML5 that demonstrates the use of form elements and media elements such as images, audio, and video.

Description

The portal allows users to view details of an upcoming event through HTML5 media elements (image banner, promotional video, background audio).

Users can then register for the event using an HTML5 form with various input types (text, email, date, radio buttons, select menus, textarea, file upload).

This experiment demonstrates the integration of multimedia content and interactive form elements in a modern HTML5 webpage.
